

PRAVAS KUMAR

EXPERIENCE

Senior Consultant

Malayaj Solutions

📅 2020 - Present

- Great team player with a taken opportunity to drive many deliverable and designing the new application based on Microservices-based Architecture.
- Rewrite, designing and Developing **Different Banking system** solutions from monolithic Application to **Microservices** using the latest technology **Core java, J2ee, Spring boot, PCF cloud, React JS, OAuth, Gradle, Mockito, Kubernetes, Docker, AWS.**
- Withing targeted deadline worked on Technical parameters (App fit Maturity, **ITRC Vulnerability**, SONAR Code Quality) and bring down the vulnerability from **650 counts to 85 counts.**

Senior Associate

JPMorgan Chase & Co.

📅 06/2017 - 2020

- Team player with a can-do attitude with strong customer focus.
- Developed successfully Merchant onboarding and Payment solution certification project for more than two years for 3 different platforms.
- Strong working knowledge of **Core Java, JEE, JSON, XML, REST APIs like Java API for RESTful Web Services (i.e. JAX-RS, Spring), Spring, Spring boot, Microservices(Eureka and Zuul), Mybatis, IBM ODM Rule engine.**
- Keep code quality high reviewing code of other developers and keep suggesting improvement area.
- Expert knowledge of Unit Testing (incl. **Mockito, Power mock**)
- Flexible/quick learners, comfortable with a variety of platforms - conversant with new-age development frameworks.
- Positioned team to the best team on Technical parameters (**App fit Maturity, ITRC Vulnerability, SONAR Code Quality**).
- **Used Scrum Agile Methodology** in my work (Daily Scrum Meeting, Planning Poker, Sprint Backlog, 1on1 meeting, Retro meetings)

Technical Lead

Cognizant Technology Solutions

📅 09/2015 - 2017

- Gauss DB Tools was a tool to monitor real-time Cluster health. One Cluster having a number of Instances and nodes. Our System monitors the real-time health of Clusters. All data exchange is on secure channels. Gauss DB Tools provide the statistics of clusters like CPU usage, running transaction, memory utilization, node/instance state.
- Worked for 3 module including **TCP layers** using socket programming to collect the statistic from different cluster.
- Major Technology used to develop the Gauss DB was **Java, J2EE, Hibernate, Spring MVC, Spring boot, PostgreSQL, Socket programming**, For UI used **Angular JS framework**.
- Positioned team to the best team on Technical parameters.
- Expert knowledge of Unit Testing (incl. Mockito, Power mock).

ACHIEVEMENTS

& Courage I had

To always leave my comfort zone. I'm not afraid to do I need to do to achieve my goals!

□ Persistence & Loyalty

Despite any hard situation, I keep my focus on my goals and always move towards them. Keep Company culture on top to prove my loyalty

@ Company growth

I helped in resource hiring/Interviewing where from a 10 member team size to 60 member team size within 3 months of time span

TECHNOLOGIES

Backend

Java & J2EE	Spring	Spring boot
Service Discovery Eureka	ActiveMQ	
Hibernate/Mybatis	Spring REST API	
JPA	Tomcat	Zuul Proxy Gateway
Oracle	WebLogic	Microservices
MySQL	Mockito	Power Mockito
Struts 1.x and 2.x		

Frontend

Angular /Angular JS	HTML	CSS
Java script	React JS	
Tool / Technology		

DevOps Tool

Docker	Kubernetes	Jenkins
Jules		

EXPERIENCE

Technical Lead

Zensar Technologies

06/2013 - 09/2015

- Worked for customer facing, covering Technical & Team Management and gained the domain knowledge of **Health Insurance**
- eMMS MMD was the PRE Authorization system in the Pru Insurance, This system will generate the PRE Auth number and Letter which will use for the further processing or submitting of the claim

Senior Software Engineer

Atos India Pvt Ltd

2010 - 04/2013

- Worked for eApproval application which manages the submission and approbation of Appropriation Requests(AR)
- Facilitate traversal reporting (link the application to MFG/PRO and PDS/SPRINT)
- Prepared and installed solutions by determining and designing system specifications, standards, and programming
- Improved application by conducting systems analysis; recommended changes in technology and architecture in
- Converted Monolithic Struts Application into Spring MVC
- Worked in Technologies: **Core Java/J2EE, Struts, SOA BPPEL, Quartz Job, JavaScript, JSP, HTML, CSS.**
- Used Scrum Agile Methodology in my work (Daily Scrum Meeting, Planning Poker, Sprint Backlog, 1on1 meeting)

CERTIFICATION

AWS Certified Solutions Architect - Associate

Certified from AWS Online Training - Experience with **EC2, Cloud Watch, Elastic Load Balancing**, and managing securities on AWS. Explored and Extensive experience focusing on services like **IAM, S3, Elastic Cache, AWS CodeCommit, CodeBuild, CodeDeploy, CodePipeline.**

PASSIONS

Passion to Learn the Banking Domain in depth.

Passion to build the NEO bank and I Can draw the HighLevel architecture design of DIGITAL Bank.

EDUCATION

Master of Computer Application

UP Technical Board Lucknow

% GPA

67% / 100

TECHNOLOGIES

Engineering Tools

Maven

Git

SonarQube

JIRA

Bitbucket

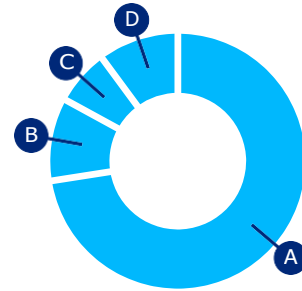

IntelliJ IDEA

AWS

ServiceNow

Confluence

MY TIME

- A** Develop/write code, Test, deploy and Design module for scalable product.
- B** Giving feedback and supporting other developers in team to help them to resolve any technical challenges.
- C** Read tech blogs or news.
- D** Manage my most of the meetings and before leaving from work create target goals for Tomorrow.
